

GOCHARGE LAUNCHES SOLAR CHARGING STATION FOR MOBILE DEVICES AHEAD OF MUSIC FESTIVAL SEASON

Leading Provider of Charging Stations at Conferences, Universities, Hospitals, Stadiums and More Now Offers Green Option For Outdoor Events

(New York – February , 2017) – Available for rent or sale, [goCharge \(www.gochargenetworks.com\)](http://www.gochargenetworks.com) provides Charging Stations that keep people connected to family, friends and business, in all locations. The Company announced today a new solar panel Charging Station, The *SolarSystem*, that is specifically designed for music festivals, outdoor concerts, and other outside entertainment events.

Based in New York City, goCharge offers the industry’s broadest array of Charging Stations, including free-standing kiosks (with 10 to as many as 40 individual secure lockers), **functional furniture charging tables, and a series of versatile table-top stations**. Since its establishment in 2009, goCharge has become the most prominent Charging Station provider to business-to-business conferences, serving over 300 such events each year. Leveraging this successful program, the Company expanded into the [outdoor Entertainment market](#) in 2013, providing outdoor-applicable Charging Stations to [major festivals](#) including Bonnaroo, South by Southwest, Ultra, and Governor’s Ball, among others. Over the past 3 years, goCharge has provided Charging Stations to over 100 [outdoor music festivals and concerts](#).

These high-traffic events, and those that operate in [outdoor environments](#), demand charging stations.

Most recently, the Company was approached by Live Nation (www.livenation.com), a global entertainment company, to design a “Green” Station for its arenas and amphitheaters across the nation. In a short time, goCharge introduced the [SolarSystem](https://gochargenetworks.com/solar-system-outdoor-solar-charging-station) (<https://gochargenetworks.com/solar-system-outdoor-solar-charging-station>)—a Station using only the energy of the sun--and now Live Nation customers at 18 major venues (including Jones Beach Theater, NY; Xfinity Centers, CT & MA and Shoreline Amphitheater, CA) can enjoy free phone and tablet charging throughout the event.

Additionally, [The Smithsonian rented 5 SolarSystems](#) to provide a courtesy to its guests at the Grand Opening of the Smithsonian National Museum of African-American History & Culture.

While the *SolarSystem* is an outstanding charging station for [Concerts and Festivals](#), goCharge offers several other appropriate Charging Stations for this market. For example, goCharge has provided its [Eagle model](https://gochargenetworks.com/indoor-outdoor-charging-station) (<https://gochargenetworks.com/indoor-outdoor-charging-station>)—40 lockers, 2 digital screens, exceptional branding space for sponsors—at events including The U.S. Open, The BET Experience, Bryant Park Skating Rink, Electric Zoo, and The Philadelphia Marathon. In addition, the Company’s [Hi-Top Charging Tables](https://gochargenetworks.com/charging-tables) (<https://gochargenetworks.com/charging-tables>), and [Atlas model](#)

(<https://gochargenetworks.com/atlas-charging-locker>), free-standing stations with 10 open or secured bays, have been very popular at many events such as The Super Bowl, Bonnaroo, Coachella, Governor's Ball, SXSW, New Orleans Jazz Fest, Daytona National Speedway, Preakness, Comic Con.

"Everyone uses their cellphones at concerts and festivals from beginning to end—whether it's a fan, performer, or staff. There is a constant need to stay connected to friends and family, take videos and photos, engage in social media, even to check the weather or find food and drinks. So what happens? Battery life rapidly drops, and people are desperately looking for a way to recharge," stated David Walke, CEO of goCharge. "Whether it's the goCharge *SolarSystem*, or our extremely popular charging tables and other charging models; it allows everyone the ability to charge up at any time at one of several stations. They absolutely love it!"

Mr. Walke continued, "We are also thrilled that advertisers and sponsors, including Dunkin Donuts, Toyota, Jack Daniels, and Mattress Warehouse, have enthusiastically embraced the goCharge *SolarSystem*. They are "connecting" with their target audience in a fun and uplifting way."
